Signal Processing 29 (1992) 351–352
Elsevier

Cumulative contents

Volume 29, No. 1, October 1992

Papers

J. Bigün
Frequency and orientation sensitive texture measures using linear symmetry 1

G. Steidl
Chebyshev polynomial derivation of composite-length DCT algorithms 17

A.B. Fineberg and R.J. Mammone
A method for instantaneous frequency tracking of multiple narrowband signals 29

W. Sun and T. Yahagi
Adaptive overfitting lattice filter for parameter estimation of time-varying systems 45

M.H. Er and S.K. Hui
Array pattern synthesis in the presence of faulty elements 57

S.C. Scoular and W.J. Fitzgerald
Analytic sampling of bandpass signals 67

W. Kozek
Time–frequency signal processing based on the Wigner–Weyl framework 77

W.A. Kittel and M.H. Hayes
Symbolic representation of process monitoring signals 93

Book review 107

Announcements and calls for papers 109

Volume 29, No. 2, November 1992

Papers

W.A. Gardner
A unifying view of coherence in signal processing 113

M.A. Lagunas and M. Nájar
Source reference in CIR beamforming 141

P. Nagel
Non-causal complementary filters 151

A.J. Anderson
Comparative performance of a filter and a fixed-lag smoother 165

M. Renfors, S.K. Mitra, P.A. Regalia and Y. Neuvo
Generalized doubly complementary IIR digital filters 173

E.R. Davies
Optimal template masks for detecting signals with varying background level 183

B. Haywood and R.J. Evans
Discrete 2-D system identification for imaging rotating radar targets 191

Short communication

P.S. Naidu and H.R. Udaya Shankar
Source localization in a wedge shaped shallow sea 213

Book alerts 225
Book review 227
Thesis alerts 229
Announcements and calls for papers 231

Volume 29, No. 3, December 1992

Papers

L. Vandendorpe
CQF filter banks matched to signal statistics 237

E.W. Jacobs, Y. Fisher and R.D. Boss
Image compression: A study of the iterated transform method 251

E.R. Dougherty, R.M. Haralick, Y. Chen, C. Agerskov, U. Jacobi and P.H. Sloth
Estimation of optimal morphological τ-opening parameters based on independent observation of signal and noise pattern spectra 265

S.F. Yau and Y. Bresler
Maximum likelihood parameter estimation and subspace fitting of superimposed signals by dynamic programming – An approximate method 283

J.A. Tague, L.H. Sibul and A.N. Mirkin
Matrix representations of propagation and scattering operations 299

P. Stoica, T. Söderström and S. Van Huffel
On SVD-based and TLS-based high-order Yule–Walker methods of frequency estimation 309

S. Choi and T.K. Sarkar
Adaptive antenna array utilizing the conjugate gradient method for multipath mobile communication 319

C.-Y. Chi and S.-L. Chiou
A new WLS Chebyshev approximation method for the design of FIR digital filters with arbitrary complex frequency response 335

Author index 349
Cumulative contents 351
